Overview

Adding Validation

- Why client-side validation?
- What is Vuelidate
- Simple Validation
- Multiple Rules
- Component Validation
- Centralizing Rules

Why Validate Forms?

- The closer the error is to the user...
  - ...the easier it is for them to fix it
- Improves the user experience
- Improves data quality

Vuelidate 2

- Based on Popular Vue 2 Library
- Model-based validation
- Rules are defined near data
- Not only solution for validation
